

Mercedes Franchesca Gonzalez Cejas

Software Engineer | Flutter Developer | Mobile Apps (Android/iOS)

Barcelona, Catalonia, Spain · mercedesgon03@gmail.com · linkedin.com/in/mercedes-franchesca-gonzalez-cejas-7555a7177 · github.com/mfranchescagonzalezcejas

PROFESSIONAL SUMMARY

Software Engineer specialized in mobile application development with Flutter, with hands-on experience shipping apps to production. Background in Android and iOS development using Kotlin, Swift, UIKit, SwiftUI, and Flutter. Full development cycle experience: UI implementation, business logic, REST API integration, testing, and functional validation in Agile/Scrum environments. Additional experience in manual QA with Jira, test plans, and test cases.

PROFESSIONAL EXPERIENCE

Native Apps Developer | Worldline Global Services

Barcelona · Apr 2024 – Jan 2026

- Led development as main developer on La Merce 2024 (Flutter), a public app released to production for a major Barcelona cultural event, coordinating with senior team to meet quality standards and launch deadline.
- Developed the air quality feature for Barcelona a la Butxaca (live public app), owning the main implementation with technical support from the team.
- Maintained and shipped new features for Barcelona a la Butxaca, working on an existing production codebase.
- Implemented UI, business logic, REST API integration, debugging, testing, and pre-release validation in Agile/Scrum delivery cycles with code review.
- Supported manual QA for Nescafe Dolce Gusto using Jira, structured test plans, test cases, and validation of reconnection and brew flows with NEO1 and NEO2 machines.

Native Apps Developer Intern | Worldline Global Services

Barcelona · Apr 2023 – Apr 2024

- Intensive technical training in mobile development for Android and iOS, delivering functional projects as part of onboarding to the professional team.
- Built an Android expense tracker app with Kotlin, Jetpack Compose, Room, and Koin, applying layered architecture (data/domain/UI), Repository pattern, dependency injection, and local SQLite persistence.
- Built the same functionality twice for iOS — first with UIKit (UITableViewController, Storyboard), then rewritten in SwiftUI — consolidating hands-on knowledge of both native iOS paradigms.
- Built a Flutter app as a bridge toward the team's cross-platform stack.
- Participated in testing, validation, and incident resolution within a professional team environment.

Front-End Developer Intern | Avanade

Barcelona · Oct 2021 – Apr 2022

- Developed solutions with PowerApps and Microsoft ecosystem tools on client projects.

PROJECTS

InkScroller | Personal full-stack mobile project (active development)

- Manga reading app built with Flutter (Dart) and a custom FastAPI (Python) backend deployed on Railway with PostgreSQL.
- Full authentication flow with Firebase Auth, including JWT token verification from the backend and library sync across authenticated sessions.
- Mobile architecture using Riverpod for state management, layered structure, and local-first repository pattern with remote sync.
- CI/CD with GitHub Actions: test pipeline, static analysis, release automation, and semantic versioning.
- Stack: Flutter · Dart · FastAPI · Python · PostgreSQL · Firebase Auth · Railway · GitHub Actions · Riverpod · REST APIs

TECHNOLOGIES

Flutter, Dart, Kotlin, Jetpack Compose, Room, Koin, Swift, SwiftUI, UIKit, Android Studio, Xcode, FastAPI, Python, PostgreSQL, Railway, Firebase Auth, Docker, REST APIs, Git, GitHub Actions, CI/CD, Riverpod, Agile/Scrum, Jira, Testing, QA

EDUCATION

Telecommunications Engineering | Universitat Pompeu Fabra — Barcelona **Master's in AI Development (online, in progress) | BIG School**

Started March 2026
